CAREER OBJECTIVE

"I'm a detail-oriented data analyst with Power BI and SQL Server expertise. I am passionate about transforming raw data into actionable insights to drive informed business decisions. Seeking a challenging role where I can leverage my technical skills and contribute to data-driven success."

SKILLS

- Microsoft Power BI
- SQL Server
- Microsoft Excel
- Data Analysis

PROJECTS

1. Sales Performance Dashboard (Power BI)

- Developed an interactive dashboard to visualize sales performance metrics.
- Extracted data from SQL Server databases and transformed it using Power Query.
- Created dynamic visualizations, including sales trends, regional comparisons, and product performance.
- Presented insights to the sales team, leading to improved decision-making.

2. Customer Segmentation (SQL Server)

- Conducted customer segmentation analysis using SQL Server.
- Leveraged clustering techniques to group customers based on purchasing behavior.
- Developed targeted marketing strategies for each segment, resulting in increased customer engagement.

EDUCATION

Bachelor of Commerce

The University of Burdwan | 2017

CERTIFICATION

Microsoft Certified: Data Analyst Associate

- Issued by Microsoft, Valid until 2025
